

**DENTAL**

Promote superior oral health through tartar control, a textured kibble with unique tooth-scrubbing effect, and plaque reduction.

- Feline Dry 12oz. & 7.7#
- Canine Dry 7.7# & 17.6#
- Canine Small Dog Dry 6.6#

**DIABETIC**

This formula has a low starch content and high protein to help maintain muscle mass in overweight diabetic animals. In addition, this formula helps in the management of post-prandial blood glucose levels.

- Feline Dry 4.4#
- Canine Dry 7.7#
- Canine Canned 14oz.

**GASTRO** GIM 23  
**INTESTINAL**

Each Gastrointestinal diet is formulated to help maintain the balance of good and bad bacteria naturally found in the GI tract through the addition of the following nutrients: probiotics, omega-3 fatty acids, antioxidants, and zeolite.

**GASTRO** GIM 23  
**INTESTINAL**  
Low-Fat

In dogs who cannot digest fat easily due to their GI disease, a low fat diet is critical to improve digestive function.

- Canine Dry 6.6#
- Canine Dry 17.6#
- Canine Canned 13.5oz

**GASTRO** GIM 23  
**INTESTINAL**  
Mod. Calorie

A lower-calorie option that still provides the same benefits of the adult high energy formula.

- Feline Dry 7.7#
- Feline Canned (morsels in gravy) 3oz
- Canine Dry 22#

**GASTRO** GIM 23  
**INTESTINAL**  
High Energy

A diet with higher fat and calorie content improves palatability and provides adequate calorie intake in smaller meal portions for pets who have decreased appetites as a result of their GI upset.

- Feline Canned (pate) 5.8oz
- Canine Dry 8.8#

**GASTRO** HF 23  
**INTESTINAL**  
Fiber Response

Some gastrointestinal diseases respond well to an increase in fiber in the diet. This formula's fiber levels aid in the management of diarrhea and constipation.

- Feline Dry 8.8#

**HEPATIC** HF 16

Crafted to help promote liver health in your dog, this food contains a nutrient-rich formula, packed with vitamins and minerals for a healthy, wholesome diet.

- Feline Dry 8.8#
- Canine Dry 7.7#

**HYPOALLERGENIC**  
HYDROLYZED PROTEIN

This diet manages adverse food reactions that cause skin irritations and/or gastrointestinal distress.

- Feline Dry 7.7#
- Canine Dry 7.7#
- Canine Dry 25.3#
- Canine Canned 13.7oz

**RENAL**

By enhancing nutrients like B vitamins and the fatty acids EPA and DHA, and restricting others such as protein, phosphorus, and sodium, this food slows down the development of this condition.

- Feline Dry-Aromatic 3 & 6.6#
- Feline Dry- Savory 3 & 6.6#
- Feline Dry- Flavorful 3 & 6.6#
- Feline Canned- D (morsels in gravy) 3oz
