Surgical procedures: For new patients and patients we have not seen in the last year, we require a full exam with the doctor prior to your pet's surgery to provide the most accurate treatment plan. Ideally, this exam will take place at least 2 days prior to your pet's surgery to allow ample time for any bloodwork. Please let us know if this is not an option for you, as we have other times we can meet with you and your pet prior to surgery. This exam charge is \$57.

- All of our surgical procedures include a pre-surgical examination and evaluation for anesthesia, anesthesia and monitoring, and hospitalization. All surgeries include IV catheterization and fluids to help maintain blood pressure during anesthesia and to provide an emergency access to the vein.
- We recommend the following options for all pets undergoing general anesthesia:
 - Pre-anesthetic bloodwork to check liver and kidney function is required for pets older than 7 years old and must be within 6 months of the procedure: \$88.00
- Dogs – surgery price plus pain medication ranging from \$32-67 depending on size of your pet:
 - Spay (ovariohysterectomy): dogs that have not gone through a heat cycle range from \$457-489, depending on the size of your pet.
